Governor David A. Paterson  
State Capitol  
Albany, NY 12224

Dear Governor Paterson:

We urge you to take all actions necessary, to permit counties to continue to use mechanical lever voting machines.

Our democracy is founded on free and fair elections. Public confidence in our electoral system is crucial. Fair elections and public confidence are founded on reliable and secure processes for casting and counting ballots.

In October 2002, the United States Government enacted the Help America Vote Act (HAVA) to require states to replace antiquated and unreliable voting systems and to insure that voting is accessible to all voters, including those with disabilities.

Mechanical lever voting machines now in use in Westchester County and elsewhere in New York State have long proved reliable, user-friendly and cost-effective. Replacing lever voting machines is very costly and will unduly burden county taxpayers. It has proved to create voter confusion and, in some cases, may result in the use of machines that could compromise the integrity of future elections.

When used in conjunction with optical scanners (with ballot-marking devices to accommodate voters with disabilities) to count paper ballots by precinct, lever voting machines can be part of a voting system which is HAVA compliant and is in the best interest of the public.

We note that while preferable to touch screens, optical scan voting machines have malfunctioned in many counties throughout the United States including Upshur County, West Virginia; Palm Beach County, Florida; Oakland County, Michigan as well as Washington, D.C.

Accordingly, we respectfully urge you to take all actions necessary, including the amendment of the Election Reform and Modernization Act (ERMA), to permit counties to use lever voting machines in combination with paper ballots counted by precinct on optical scanning machines in future elections.
